

## How to light gas fireplace pilot (if pilot flame is off):

**NOTE:** the instruction card is placed under the fireplace on the left after the screen is removed.

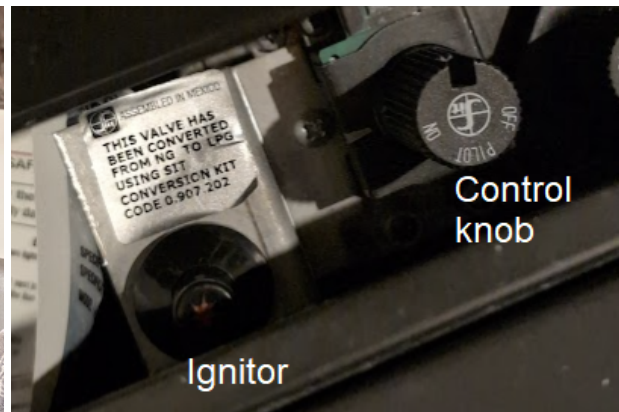

You can follow this instruction video: [https://youtu.be/CvL\\_fAFRIW8](https://youtu.be/CvL_fAFRIW8)

(follow the steps in this video until minute 2:20 ONLY until pilot is established and then use the remote on the wall to turn on the flame after the pilot is on)

### Or the instructions below:

- (1) Please take off the **SCREEN COVER** (only the front screen cover) to have access to the control knob. **IMPORTANT:** if you smell gas, please do not attempt the steps below and turn the control knob to OFF

- (2) **PUSH** and **TURN** the control knob counterclockwise to **PILOT**
- (3) **PUSH** the control knob and hold it. Use the other hand to press the **RED IGNITOR** 3-5 times until the pilot is on. Then keep holding the control knob for approximately 25-30 seconds (there should be multiple beeps to confirm that the pilot is established). If the pilot doesn't come up, turn the control knob to OFF and wait another 5-10 minutes before trying Step 2 again.
- (4) Once the pilot lits up, turn the control knob to ON and put back the screen cover. Then please use the remote on the wall to turn the fireplace on
